

TriColi STOP capsules from Pigeon Vitality put to the Test

The recent introduction of the new and innovative product discovery "TriColi STOP" from the Norwegian nutritionists experts Pigeon Vitality is demonstrating and proving some remarkable results around the UK.

Testimonials are flooding in from customers trying out the new capsules.

Real proof that this natural product does remove *Trichomonas gallinae*, canker in pigeons and brings the pigeons into their peak racing condition.

Before TriColi photo - L. Smith, Kilmarnock

Lee Smith Kilmarnock Invitation H S

"I discovered to my horror a few of my young birds had developed canker which was very severe around the throat and mouth area.

After the administration of 1 x TriColi capsule for 3 days on the severely affected pigeons they were all completely cured and to my amazement, also in excellent condition.

After treating all of the other youngsters with only 1 x TriColi capsule to prevent the same, they are looking superb and ready for racing

This is a fantastic natural product indeed and I would never have believed the results if I had not seen it for myself. Well Done to all at Pigeon Vitality. Absolutely Brilliant"

After 3 capsules, photo - L. Smith

Fast and Effective Removal of Canker within hours

Brings the pigeon into its Peak Racing Condition
